

BIOGRAPHY

Erin Byrne

Vice President & Chief Technology Officer,
Communications Solutions

Appointed in March 2024, Erin Byrne serves as the Vice President and Chief Technology Officer for the Communications Solutions segment. As technical leader for the Communications Solutions segment, Erin's responsibilities include providing technology strategic direction, engineering talent and workforce development, and value creation from innovation for the segment's Appliances and Data and Devices Business Units.

Erin joined TE Connectivity in 2011 as Director of Advanced Development and held several product development leadership roles in the Data and Devices Business Unit before becoming CTO in 2018. In 2021, Erin moved to become the CTO of the Sensors Business Unit, part of TE's Transportation Solutions segment. With depth and breadth in different product groups across the company, Erin specializes in solving tough challenges using the global strength of TE's engineering workforce.

Prior to joining TE, Erin held engineering leadership positions developing semiconductor lasers for fiber optic communications at AT&T Bell Laboratories and subsequent spinoffs. She has also held commercial roles in several industry verticals, including as CEO of an optical sensing startup.

Erin holds M.S. and Ph.D. degrees in Inorganic Chemistry from Cornell University, and a Bachelor's degree in Chemistry from the University of Rochester.
